

## Sitzbock.

204 range

Sitzbock  
Design: Rudolph Schelling Webermann

When people engage with each other spontaneously and informally, this can serve as a source of inspiration, innovation, and change.

Facilitating a change of perspective that looks beyond job roles and hierarchies requires refreshing design ideas like the Sitzbock pommel horse seat, which inspires both the body and the mind to try something different. You can sit astride, “ride side saddle,” or use it to lean on. Made from through-dyed polypropylene in four colors and weighing just 4.8 kg (10 1/2 lbs), the seats are easy to place in groups, stack crosswise or pick up and take outside for a while. Anyone preferring a little more comfort can add a non-slip felt “saddle blanket” to their Sitzbock.

OFFICE**

2018

A multipurpose seat, 707 mm (277/8 inches) in height, 627 mm (241/16 inches) in width, and 520 mm (207/16 inches) deep when measured at the angled legs. It's made of through-dyed polypropylene with non-slip glides and comes with an optional felt saddle blanket.

Even stacked at right angles, the Sitzbock pommel horse seats are eye-catchers that invite people to stop and talk to each other.
